EUROPASS CURRICULUM VITAE

DESCRIPTION

Europass is a free online service created by the Directorate General for Education and Culture of the European Union to improve the transparency of qualifications and mobility of European citizens. The tool allows you to create your own Curriculum Vitae (with cover letter). The Europass CV is one of the best known curriculum formats in Europe. Easy to consult, it is familiar to employers and educational institutions.

ACCESS MODE

By entering the website, you can first create a Europass profile with information on your education and training path, work experience and skills. After completing the Europass profile, you can create your CV to your liking by selecting the information to be entered directly from your personal profile and choosing the formatting you prefer. CVs can be created, stored and shared in 29 languages. Once created, your Europass CVs can be downloaded, stored in the Europass library and shared with employers, EURES (European Job Mobility Portal) or other job portals.
